About

Technology and innovation caught my eye from a young age, and it was the field that I chose to follow. My studies first started at the Vocational High School of Sivitanidios to learn the basics of computing and later continued my studies at the Metropolitan College of Athens in the field of Computer Science which followed the University of East London program. After completing my military duties I began some self-taught coding during the 2020 pandemic. My goal is to help people by creating useful software.

Skills

JavaScript, HTML5, CSS3, Node.js, Git, C#, SQL, Java, Android Studio, Visual Studio, Firebase

---

Projects

e-Call Android Application / Android Studio, Java
November 2018 - September 2018

European emergency information, location tracking and sharing with authorities via 112(EU emergency number)

Lockdown Mobile Application / Android Studio, Java
November 2020

The application was created in order to help me, my family members and friends deal with the repetitive task of sending messages to the government's mandatory SMS number in order to visit shops during the COVID lockdown era.

Twitch Chrome Extension who-is-online / JavaScript, HTML, CSS
April 2022
An extension using Twitch API to help the user easily track his followed twitch streamers that are online.

Education

University of East London / BSc(Hons) Computer Science
October 2015 - September 2018, Athens

Completed my Bachelor's degree program in Computer Science at the Metropolitan College.

University of Michigan / Certificate of Competency in English (B2)
May 2014
